Projects

ResponsivePortfolio website: <https://musthu2209.github.io/html-portfolio/>

Developed a fully responsive portfolio website using **HTML**, **CSS**, and **JavaScript**. The website is designed to provide an optimal viewing experience across a wide range of devices, from desktop computers to mobile phones. Key features include:

- **Responsive Design:** Implemented media queries and flexible grid layouts to ensure the website adapts smoothly to different screen sizes and resolutions.
- **User-Friendly Navigation:** Designed intuitive and accessible navigation to enhance user experience.
- **Interactive Elements:** Integrated interactive elements such as hover effects, animated transitions, and a responsive image gallery to engage visitors.
- **Cross-Browser Compatibility:** Tested and ensured compatibility across major browsers including Chrome, Firefox, Safari, and Edge.
- **SEO Best Practices:** Applied SEO best practices to improve search engine visibility and drive organic traffic to the website.
- Showcased Previous Front End Projects as Tiles

Java Simple Calculator

Developed a simple calculator application in Java using the Abstract Window Toolkit (AWT) for the graphical user interface. The project demonstrates proficiency in Java programming and GUI design.

JavaScript Projects:

- **Quiz app:** Validates the Right or Wrong answers given within a limited time by users in multiple choice Questions
- **Weather App:** Finds the weather of user inputted location
- **CalculatorApp:** Solves Simple Arithmetic Problems like Addition, Subtraction, Division, Multiplication
- **To Do List:** Let's user add and remove tasks
- **Password Generator:** Generates Password for users with the specifications mentioned by user
- **Form validator:** validates Basic Login form
- **QR Code Generator:** Generates QR code for user inputted URLs
- **StopWatch:** Stopwatch with basic functionalities Designed using CSS and Javascript
- **Analog Clock:** Displays Analog clock with updated time
